EDCOR 310

THE SCIENCE OF LEARNING:

An Evidence-Based Approach to Educational Psychology

COURSE WORKBOOK

WHAT'S INSIDE

99 Studies

Three studies a week, with takeaways for teaching and life.

Paper of the Week

One research article, read closely and made sense of.

Class Notes

A page for every class day, built to help you remember.

NAME: _____

EDCOR 310

The Purpose of This Workbook

This course is about how people learn, grow, and change. This workbook is where you practice that on yourself.

Most of what we cover this semester, you could look up later. What you can't look up is the change in how you see learners, how you teach, and who you're becoming. That change comes from thinking hard about ideas, pulling them back out of memory, connecting them to your life, and acting on them. Every page in this workbook is built to help you do one of those things.

So write messy, sketch, and leave a box blank when it doesn't fit the day. By the end of the semester you'll have a record of what you learned and what you decided to do about it.

Make meaning

Connect new ideas to what you already know and to the people you'll teach.

Remember

Pull ideas out of memory, then come back to them after a gap.

Become

Decide what you'll do differently as a disciple, teacher, and leader.

> *"Seek ye out of the best books words of wisdom; seek learning, even by study and also by faith."*
>
> **DOCTRINE AND COVENANTS 88:118**

EDCOR 310

Table of Contents

GETTING STARTED How to Use i Your Week ii APA Citations iii Research Terms iv Examples v–viii

WEEK	CLASS NOTES DAY 1	CLASS NOTES DAY 2	99 STUDIES	PAPER OF THE WEEK
Week 1	1	3	–	–
Week 2	5	7	9	10
Week 3	11	13	15	16
Week 4	17	19	21	22
Unit 1 Review	*Brain dump & unit synthesis*			23–24
Week 5	25	27	29	30
Week 6	31	33	35	36
Week 7	37	39	41	42
Unit 2 Review	*Brain dump & unit synthesis*			43–44
Week 8	45	47	49	50
Week 9	51	53	55	56
Week 10	57	59	61	62
Unit 3 Review	*Brain dump & unit synthesis*			63–64
Week 11	65	67	69	70
Week 12	71	73	75	76
Week 13	77	79	81	82
Unit 4 Review	*Brain dump & unit synthesis*			83–84

Numbers are page numbers. Each class day is a two-page spread.

Course Synthesis ..... Pg. 85

How to Use This Workbook

This workbook is where you think on paper. It has four kinds of pages. Each one is built to help you understand ideas, remember them, and use them.

CLASS NOTES

EVERY CLASS DAY

Take notes, record tricky practice questions, build your vocab, and connect what you learned to your life.

99 STUDIES

WEEKLY, FROM WEEK 2

Pick three of the week's nine studies. Write takeaways for teaching, for life, and gospel connections.

PAPER OF THE WEEK

WEEKLY, FROM WEEK 2

Read one research article closely. Pull out its citation, judge the evidence, and bring it to the jigsaw.

UNIT REVIEW

END OF EACH UNIT

Brain-dump everything from the unit, pick your top ten, five, and three, then reflect on who you're becoming.

Take notes your way

You're welcome to take notes however works best for you: on the Class Notes pages, in a notebook, or on a laptop. The workbook is here to help. Use the boxes that help you make sense of the day and leave the rest blank. A page with a few thoughtful answers beats a page full of filler. The examples on pages v–viii show what that can look like.

Bring it to every class

You'll use it during class, and some days we'll stop and work on one box together.

Two habits do the most for your memory

- **The warm-up.** Before class starts, write what you remember from last time without looking. Pulling ideas out of memory makes them stick better than rereading.
- **The 48-hour check.** Two days later, cover both pages and see what you can still recall. Then cover the answers and retry your tricky practice questions. Coming back after a gap is what makes learning last.

Rate yourself at the end

Each Class Notes page ends with a short self-check: did these notes help you make sense of the ideas, remember them, and grow as a disciple, teacher, and person? Be honest. It's for you.

> **What's due when?** Page ii lays out a normal week, with about how long each piece takes. Each Class Notes page also starts with a short checklist of what to finish before that class.

Your Week

Every week has two class days and two readings. Reading **X.1** is due right before the first class of the week, and **X.2** right before the second. Plan on about two hours of preparation a week.

WHEN	WHAT TO DO	ABOUT HOW LONG
Before Class 1 Reading X.1	Read that week's **Joy of Learning** reading.	**1 hour**
Before Class 2 Reading X.2, research seminar	• Watch the Bluey or Therapy in a Nutshell video. • Fill out your **99 Studies** page (three studies). • Read and fill out the **Paper of the Week**. Bring both pages to class for the jigsaw.	**1 hour** 15 min 15 min 30 min
Two days after each class	Do the **48-hour check** on that day's Class Notes, and retry your tricky practice questions.	**A few minutes**
End of each unit After Weeks 4, 7, 10, and 13	Do the **Unit Review**: brain dump, top ten, five, and three, and the unit synthesis.	**In class**

Good to know

- **Week 1** has reading 1.1 but no research seminar. 99 Studies and Paper of the Week start in Week 2.
- Each week's 99 Studies and Paper of the Week pages come right after that week's Class Notes.
- Each Class Notes page starts with a **Before this class** checklist, so you can check things off as you go.
- The times are estimates. Some weeks will go faster and some slower. If a week regularly takes you much longer, tell us.

Reading an APA Citation

Every research article has a citation: a short line that tells anyone exactly how to find it. Here's one, broken into its parts. Each Paper of the Week page asks you to find the first four pieces.

❶ Roediger, H. L., III, & Karpicke, J. D. ❷ (2006). ❸ Test-enhanced learning: Taking memory tests improves long-term retention. ❹ *Psychological Science*, ❺ *17*(3), ❻ 249–255. ❼ https://doi.org/10.1111/j.1467-9280.2006.01693.x

❶	**Author(s)**	Last name, then initials. Put **&** before the last author. *Find it under the title on the first page.*
❷	**Year**	In parentheses, followed by a period. *Usually on the first page, near the journal name or in the footer.*
❸	**Title**	Capitalize only the first word, the first word after a colon, and names. Not italic. *Top of the first page.*
❹	**Journal**	The journal's name, in italics, with major words capitalized. *In the header or footer of the first page.*
❺	**Volume (issue)**	The volume number is italic; the issue number goes in parentheses and isn't italic.
❻	**Pages**	First and last page of the article, with a dash between them.
❼	**DOI**	A permanent link to the article. It starts with "10." and is written as https://doi.org/… *Look at the top or bottom of the first page.*

> **On your Paper of the Week page,** you'll write the author(s), year, title, and journal, then check the box once you've found the DOI. Those pieces, in that order, are the backbone of every APA citation you'll ever write.

Try it: spot the mistakes

This citation for the same article has **four mistakes**. Circle them.

Roediger, Henry & Karpicke, Jeffrey (2006) Test-Enhanced Learning: Taking Memory Tests Improves Long-Term Retention. Psychological Science, 17(3), 249–255.

Answers: (1) Use initials, not first names: Roediger, H. L., III, & Karpicke, J. D. (2) The year needs a period after it: (2006). (3) The article title should be in sentence case: Test-enhanced learning: Taking memory tests improves long-term retention. (4) The DOI is missing (and the journal name and volume should be italic).

Research Terms in Plain Words

You'll see these in almost every study. You don't need to calculate any of them. You just need to know what they're telling you.

Sample size (n or N)
How many people were studied. Bigger samples give steadier, more trustworthy results.

Mean (M) and standard deviation (SD)
The mean is the average. The SD is how spread out the scores are around it.

p-value
If there were really no effect, how surprising would results like these be? A small p (usually below .05) means "probably not just luck." *It doesn't tell you how big or important the effect is.*

Statistically significant
The result is unlikely to be chance alone, usually meaning $p < .05$. Significant doesn't mean large or important.

Effect size
How big the difference or relationship is. This is the number that tells you whether a finding matters in a real classroom.

Cohen's d
The difference between two groups, in standard deviations. A rough guide: 0.2 is small, 0.5 medium, 0.8 large. *In schools, even small effects can be worth it if they're cheap and reach many students.*

Correlation (r)
How closely two things move together, from −1 to +1. Zero means no relationship. *A correlation alone can't show that one thing causes the other.*

R^2 (and η^2)
The share of the differences in one thing that another thing accounts for, from 0 to 1. An r of .30 gives an R^2 of .09, or 9%.

Experiment / randomized controlled trial
Researchers randomly put people into groups and change one thing. The best design for showing cause and effect.

Control group
The comparison group that doesn't get the new method. Without one, you can't tell what the method did.

Correlational study
Researchers measure things as they already are and look for patterns. Useful, but it can't prove cause.

Meta-analysis
A study that combines the results of many studies on the same question, giving an overall effect size.

Replication
Repeating a study to see if the result holds up. A finding that replicates is much more trustworthy.

Peer review
Other experts checked the study before the journal published it. A good sign, but no guarantee.

The hierarchy of evidence

Weaker Opinions and stories	Case studies	Correlational studies	Experiments (RCTs)	**Stronger** Meta-analyses of experiments

Class Notes EXAMPLE

You're welcome to take notes however works best for you. This page is here to help: use the parts that help you learn and skip the rest. If you only do two things, do the **warm-up** and the **48-hour check**; those do the most for your memory.

BEFORE THIS CLASS ☑ Reading 3.1: Joy of Learning *(about 1 hour)* ☑ 48-hour check from last class *(a few minutes)*

BEFORE CLASS

First few minutes **Date:** Sept 16

Warm-up: Without looking, what do you remember from last class?

schemas = mental frameworks. new stuff
sticks when it hooks onto what I know.
assimilation vs. accommodation (?)

Today's objective, in your own words:

Why pulling info out of memory beats rereading it

Messy is fine. A "(?)" means "check this later."

At the end, did I get there? ☑ Yes ☐ Partly ☐ Not yet

DURING CLASS

Tricky practice questions on the left; notes on the right if you want them.

Tricky practice questions

From your practice quizzes: ones you missed or almost missed. Write the right answer too.

QUESTION 1

Reread 3x vs. quiz myself once: who remembers more after a week?

ANSWER

Quizzing! Rereading feels better but fades.

QUESTION 2

Best example of retrieval practice?
a) highlight b) reread
c) brain dump

ANSWER

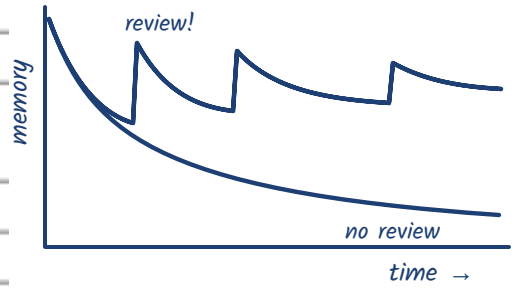

c) brain dump

Cover the answers and retry these at your 48-hour check.

Notes (optional)

Here, in a notebook, or on a laptop: whatever works for you.

Forgetting curve (Ebbinghaus)
drops fast, then levels off. Each review flattens it.

Retrieval practice = pulling it OUT, not putting it back in
Roediger & Karpicke (2006): study + test beat study + study after a week, even though study + study FELT better → !!
→ "fluency illusion": familiar ≠ learned

Teacher moves:
- brain dumps
- low-stakes quizzes
- exit tickets
- let kids struggle a little before giving the answer

Q: does this work for little kids too? (ask next class)

Sketches count. Draw it if that helps you think.

DURING CLASS

Vocab: key terms, people, and ideas to practice

Vocab (term, person, or idea)	What it means, in my own words (or an example)
Retrieval practice	pulling info from memory (brain dump, quiz yourself)
Forgetting curve	memory drops fast, then levels off; reviews flatten it
Fluency illusion	it feels easy because it's familiar, not because I know it

Three vocab terms is plenty.

To practice: cover the right column and try to explain each one out loud.

AFTER CLASS

Last few minutes, or tonight

The one idea from today I want to remember forever, in one sentence:

Struggling to remember is the part that makes it stick.

An experience from today I want to remember:

The 2-minute brain dump at the start.

I remembered WAY less than I thought.

How does today connect to something earlier in the course, or to my own life?

Left blank on purpose. Not every box fits every day.

What's still unclear?

How long should I wait before quizzing myself? Is 2 days the magic number?

Pick just one. Today helped me become a better…

○ disciple ◉ teacher ○ leader ○ spouse or partner ○ human

What will I do differently?

Open my practicum lessons with a 3-question warm-up instead of a review lecture.

48-HOUR CHECK

Two days later. Cover both pages first.

Date: Sept 18

What can I still remember? Then cover the answers on the left page and retry my tricky questions.

Forgetting curve, R&K, fluency illusion, brain dumps. Got Q2. Missed Q1 again (said rereading!), so I reread that part of Ch. 22.

SELF-CHECK

Rate yourself after the 48-hour check. Be honest; this is for you.

Honest beats perfect.

	Not yet				Yes
These notes helped me make sense of today's ideas.	1	2	3	● 4	5
These notes helped me improve my recall.	1	2	3	● 4	5
These notes helped me become a better disciple, teacher, leader, or person.	1	2	● 3	4	5

99 Studies Frayer Model EXAMPLE

Each week, you will have 9 studies to choose from. Select three of those studies. Then fill out the Frayer model below. Study 1 is the first study you chose to read about, Study 2 the second, and so on. You are encouraged to process **more** than this, but this much processing is required for class. **Bring this with you to class, too!**

STUDY 1

Title: *The one about spacing your learning*

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?
Spread practice out. Revisit old topics in warm-ups instead of one big review day.	*Study a little each day before the exam, not all of it the night before.*	*"Line upon line" (2 Ne. 28:30). We learn in small pieces over time.*

Short is fine. A few words per box is plenty.

STUDY 2

Title: *The one about how much we forget*

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?
Kids forget a lot of a lesson fast unless we come back to it. Plan the review in.	*Forgetting my Week 1 notes is normal. It means review, not that I'm bad at this.*	*"Remember, remember" (Hel. 5:12). Remembering takes effort on purpose.*

STUDY 3

Title: *The one about pre-questions*

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?
Ask a question before teaching the answer. Even wrong guesses help kids learn it.	*Before I read, look at the questions and guess first.*	

Left blank on purpose. Not every study has one.

Paper of the Week EXAMPLE

This organizer helps you make sense of a hard text: a research article in education. You're encouraged to use AI (ChatGPT, Gemini, etc.) to help you understand it, and to read strategically: look at the headings first, skim the abstract, look up the authors. You do need to spend **30 minutes** on the reading, and turning this in means you did. **Bring it filled out to class for the jigsaw.**

THE PAPER

The core pieces of its APA citation, in order (see page iii)

Your name: Alex R.

1. Author(s): Roediger, H. L., III, & Karpicke, J. D. **2. Year:** 2006

3. Title: Test-enhanced learning: Taking memory tests improves long-term retention

4. Journal: Psychological Science ☑ **I can find the DOI**

Methodology (what kind of study is it?): Two lab experiments with college students

THE EVIDENCE

What did they find, and how much should we trust it?

The numbers come straight from the results section.

Statistical significance

Look for: **p-value** and **sample size**. What statistical terms show up? Stuck on a term? See page iv.

Exp. 1: 120 students (Exp. 2: 180). They report F and t tests; the main results were significant.

Practical significance

Look for: **effect size** (and its units), **r**, **R^2**, **Cohen's d**.

After 1 week: 56% recalled after a practice test vs. 42% after rereading. d = 0.83, a large effect.

Where does this paper sit on the hierarchy of evidence?

Weaker ○ ○ ○ ● ○ *Stronger*

Why? One lab study, short readings

MAKING SENSE

In your own words

There's no single right dot. Explain your choice.

Synthesize: Give a very simple summary of this paper.

Speak to how strong the findings are and whether they matter in practice.

A practice test helped college students remember a reading a week later much better than rereading it (56% vs. 42%, d = 0.83). Rereading only won when the final test came 5 minutes later. A strong, useful finding, though it was tested in a lab.

Limitations: What are the weak spots?

Lab, not a real class. College students, short science passages, and only recall was tested.

Implications for teachers:

Quick no-stakes quizzes and brain dumps beat a review lecture or rereading.

What questions do I still have?

Why did the students who only reread think they'd remember more? Does it work for kids?

Vocabulary to look up

Add the definitions once you look them up.

idea units: the small pieces of the passage they scored

Class Notes

You're welcome to take notes however works best for you. This page is here to help: use the parts that help you learn and skip the rest. If you only do two things, do the **warm-up** and the **48-hour check**; those do the most for your memory. (See the example on pages v–vi.)

Warm-up: Without looking, what do you remember from last class?

Today's objective, in your own words:

At the end, did I get there? ☐ Yes ☐ Partly ☐ Not yet

DURING CLASS

Tricky practice questions on the left; notes on the right if you want them.

Tricky practice questions

From your practice quizzes: ones you missed or almost missed. Write the right answer too.

QUESTION 1

ANSWER

QUESTION 2

ANSWER

Notes (optional)

Here, in a notebook, or on a laptop: whatever works for you.

DURING CLASS

Vocab: key terms, people, and ideas to practice

Vocab (term, person, or idea)	What it means, in my own words (or an example)

To practice: cover the right column and try to explain each one out loud.

AFTER CLASS

Last few minutes, or tonight

The one idea from today I want to remember forever, in one sentence:

An experience from today I want to remember:

How does today connect to something earlier in the course, or to my own life?

What's still unclear?

Pick just one. Today helped me become a better…

○ disciple ○ teacher ○ leader ○ spouse or partner ○ human

What will I do differently?

48-HOUR CHECK

Two days later. Cover both pages first.

Date: _____

What can I still remember? Then cover the answers on the left page and retry my tricky questions.

SELF-CHECK

Rate yourself after the 48-hour check. Be honest; this is for you.

	Not yet				Yes
These notes helped me make sense of today's ideas.	1	2	3	4	5
These notes helped me improve my recall.	1	2	3	4	5
These notes helped me become a better disciple, teacher, leader, or person.	1	2	3	4	5

Class Notes

You're welcome to take notes however works best for you. This page is here to help: use the parts that help you learn and skip the rest. If you only do two things, do the **warm-up** and the **48-hour check**; those do the most for your memory. (See the example on pages v–vi.)

BEFORE THIS CLASS **Reading 3.2, research seminar (about 1 hour):** ☐ Bluey or Therapy in a Nutshell video *(15 min)*
☐ 99 Studies *(15 min)* ☐ Paper of the Week *(30 min)* ☐ 48-hour check from last class *(a few minutes)*

BEFORE CLASS

First few minutes

Date: _____

Warm-up: Without looking, what do you remember from last class?

Today's objective, in your own words:

At the end, did I get there? ☐ Yes ☐ Partly ☐ Not yet

DURING CLASS

Tricky practice questions on the left; notes on the right if you want them.

Tricky practice questions

99 Studies Frayer Model

Each week, you will have 9 studies to choose from. Select three of those studies. Then fill out the Frayer model below. Study 1 is the first study you chose to read about, Study 2 the second, and so on. You are encouraged to process **more** than this, but this much processing is required for class. **Bring this with you to class, too!** (See the example on page vii.)

STUDY 1 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

STUDY 2 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

STUDY 3 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

Paper of the Week

This organizer helps you make sense of a hard text: a research article in education. You're encouraged to use AI (ChatGPT, Gemini, etc.) to help you understand it, and to read strategically: look at the headings first, skim the abstract, look up the authors. You do need to spend **30 minutes** on the reading, and turning this in means you did. **Bring it filled out to class for the jigsaw.** (See the example on page viii.)

THE PAPER

The core pieces of its APA citation, in order (see page iii)

Your name: _____

1. Author(s): _____ **2. Year:** _____

3. Title: _____

_____

4. Journal: _____ ☐ **I can find the DOI**

Methodology (what kind of study is it?): _____

THE EVIDENCE

What did they find, and how much should we trust it?

Statistical significance

Look for: **p-value** and **sample size**. What statistical terms show up? Stuck on a term? See page iv.

_____

_____

Practical significance

Look for: **effect size** (and its units), **r**, **R^2**, **Cohen's d**.

_____

_____

_____

Where does this paper sit on the hierarchy of evidence?

Weaker ○——○——○——○——○ *Stronger* **Why?** _____

MAKING SENSE

In your own words

Synthesize: Give a very simple summary of this paper.

Speak to how strong the findings are and whether they matter in practice.

_____

_____

_____

_____

Limitations: What are the weak spots?

_____

_____

Implications for teachers:

_____

_____

What questions do I still have?

_____

_____

Vocabulary to look up

Add the definitions once you look them up.

_____

_____

What questions do I still have?

_____

_____

Vocabulary to look up

Add the definitions once you look them up.

_____

_____

Unit 1 Review

List everything you learned this unit, in the shortest form you can: bullet points, fragments, terms, names, quick sketches. Include what you learned indirectly, too: teaching methods you saw modeled, something a classmate said, an idea from a friend. Start without looking at your notes, then flip back and add what you missed.

BRAIN DUMP

Everything from Unit 1, as fast as you can

ELABORATE

Narrow it down, then talk it through

ON YOUR OWN

My top ten most meaningful things from this unit

1 _____

2 _____

3 _____

4 _____

5 _____

6 _____

7 _____

8 _____

9 _____

10 _____

WITH YOUR GROUP

Our top five

1 _____

2 _____

3 _____

4 _____

5 _____

ON YOUR OWN AGAIN

The three that matter most to me

1 _____

2 _____

3 _____

Unit 1 Synthesis

Look back at your brain dump and your top three. What difference will this unit make in your life?

TEACHER & DISCIPLE

Who am I becoming?

How will I be a better teacher because of this unit?

How will I be a better disciple?

LEADER

How will I lead better in each place?

In my home

In the Church

In my community

MY COMMITMENT

Make it specific enough that you could tell whether you did it

What will I do differently because of this unit?

Class Notes

You're welcome to take notes however works best for you. This page is here to help: use the parts that help you learn and skip the rest. If you only do two things, do the **warm-up** and the **48-hour check**; those do the most for your memory. (See the example on pages v–vi.)

These notes helped me improve my recall.	1	2	3	4	5
These notes helped me become a better disciple, teacher, leader, or person.	1	2	3	4	5

Class Notes

You're welcome to take notes however works best for you. This page is here to help: use the parts that help you learn and skip the rest. If you only do two things, do the **warm-up** and the **48-hour check**; those do the most for your memory. (See the example on pages v–vi.)

BEFORE THIS CLASS **Reading 7.2, research seminar (about 1 hour):** ☐ Bluey or Therapy in a Nutshell video *(15 min)*
☐ 99 Studies *(15 min)* ☐ Paper of the Week *(30 min)* ☐ 48-hour check from last class *(a few minutes)*

BEFORE CLASS

First few minutes

Date: _____

Warm-up: Without looking, what do you remember from last class?

Today's objective, in your own words:

At the end, did I get there? ☐ Yes ☐ Partly ☐ Not yet

DURING CLASS

Tricky practice questions on the left; notes on the right if you want them.

Tricky practice questions

From your practice quizzes: ones you missed or almost missed. Write the right answer too.

QUESTION 1

ANSWER

QUESTION 2

ANSWER

Notes (optional)

Here, in a notebook, or on a laptop: whatever works for you.

DURING CLASS

Vocab: key terms, people, and ideas to practice

Vocab (term, person, or idea)	What it means, in my own words (or an example)

To practice: cover the right column and try to explain each one out loud.

AFTER CLASS

Last few minutes, or tonight

The one idea from today I want to remember forever, in one sentence:

An experience from today I want to remember:

How does today connect to something earlier in the course, or to my own life?

What's still unclear?

Pick just one. Today helped me become a better…

○ disciple ○ teacher ○ leader ○ spouse or partner ○ human

What will I do differently?

48-HOUR CHECK

Two days later. Cover both pages first.

Date: _____

What can I still remember? Then cover the answers on the left page and retry my tricky questions.

SELF-CHECK

Rate yourself after the 48-hour check. Be honest; this is for you.

	Not yet				Yes
These notes helped me make sense of today's ideas.	1	2	3	4	5
These notes helped me improve my recall.	1	2	3	4	5
These notes helped me become a better disciple, teacher, leader, or person.	1	2	3	4	5

99 Studies Frayer Model

Each week, you will have 9 studies to choose from. Select three of those studies. Then fill out the Frayer model below. Study 1 is the first study you chose to read about, Study 2 the second, and so on. You are encouraged to process **more** than this, but this much processing is required for class. **Bring this with you to class, too!** (See the example on page vii.)

STUDY 1 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

STUDY 2 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

STUDY 3 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

Paper of the Week

This organizer helps you make sense of a hard text: a research article in education. You're encouraged to use AI (ChatGPT, Gemini, etc.) to help you understand it, and to read strategically: look at the headings first, skim the abstract, look up the authors. You do need to spend **30 minutes** on the reading, and turning this in means you did. **Bring it filled out to class for the jigsaw.** (See the example on page viii.)

THE PAPER

The core pieces of its APA citation, in order (see page iii)

Your name: _____

1. Author(s): _____ **2. Year:** _____

3. Title: _____

_____

4. Journal: _____ ☐ **I can find the DOI**

Methodology (what kind of study is it?): _____

THE EVIDENCE

What did they find, and how much should we trust it?

Statistical significance

Look for: **p-value** and **sample size**. What statistical terms show up? Stuck on a term? See page iv.

_____

_____

Practical significance

Look for: **effect size** (and its units), **r**, **R^2**, **Cohen's d**.

_____

_____

_____

Where does this paper sit on the hierarchy of evidence?

Weaker ○——○——○——○——○ *Stronger* **Why?** _____

MAKING SENSE

In your own words

Synthesize: Give a very simple summary of this paper.

Speak to how strong the findings are and whether they matter in practice.

_____

_____

_____

_____

Limitations: What are the weak spots?

_____

_____

Implications for teachers:

_____

_____

What questions do I still have?

_____

_____

Vocabulary to look up

Add the definitions once you look them up.

_____

_____

Unit 2 Review

List everything you learned this unit, in the shortest form you can: bullet points, fragments, terms, names, quick sketches. Include what you learned indirectly, too: teaching methods you saw modeled, something a classmate said, an idea from a friend. Start without looking at your notes, then flip back and add what you missed.

BRAIN DUMP

Everything from Unit 2, as fast as you can

ELABORATE

Narrow it down, then talk it through

	Not yet				Yes
These notes helped me make sense of today's ideas.	1	2	3	4	5
These notes helped me improve my recall.	1	2	3	4	5
These notes helped me become a better disciple, teacher, leader, or person.	1	2	3	4	5

Class Notes

You're welcome to take notes however works best for you. This page is here to help: use the parts that help you learn and skip the rest. If you only do two things, do the **warm-up** and the **48-hour check**; those do the most for your memory. (See the example on pages v–vi.)

BEFORE THIS CLASS **Reading 11.2, research seminar (about 1 hour):** ☐ Bluey or Therapy in a Nutshell video *(15 min)*
☐ 99 Studies *(15 min)* ☐ Paper of the Week *(30 min)* ☐ 48-hour check from last class *(a few minutes)*

BEFORE CLASS

First few minutes

Date: _____

Warm-up: Without looking, what do you remember from last class?

Today's objective, in your own words:

At the end, did I get there? ☐ Yes ☐ Partly ☐ Not yet

DURING CLASS

Tricky practice questions on the left; notes on the right if you want them.

Tricky practice questions

From your practice quizzes: ones you missed or almost missed. Write the right answer too.

QUESTION 1

ANSWER

QUESTION 2

ANSWER

Notes (optional)

Here, in a notebook, or on a laptop: whatever works for you.

DURING CLASS

Vocab: key terms, people, and ideas to practice

Vocab (term, person, or idea)	What it means, in my own words (or an example)

To practice: cover the right column and try to explain each one out loud.

AFTER CLASS

Last few minutes, or tonight

The one idea from today I want to remember forever, in one sentence:

An experience from today I want to remember:

How does today connect to something earlier in the course, or to my own life?

What's still unclear?

Pick just one. Today helped me become a better…

○ disciple ○ teacher ○ leader ○ spouse or partner ○ human

What will I do differently?

48-HOUR CHECK

Two days later. Cover both pages first.

Date: _____

What can I still remember? Then cover the answers on the left page and retry my tricky questions.

SELF-CHECK

Rate yourself after the 48-hour check. Be honest; this is for you.

	Not yet				Yes
These notes helped me make sense of today's ideas.	1	2	3	4	5
These notes helped me improve my recall.	1	2	3	4	5
These notes helped me become a better disciple, teacher, leader, or person.	1	2	3	4	5

99 Studies Frayer Model

Each week, you will have 9 studies to choose from. Select three of those studies. Then fill out the Frayer model below. Study 1 is the first study you chose to read about, Study 2 the second, and so on. You are encouraged to process **more** than this, but this much processing is required for class. **Bring this with you to class, too!** (See the example on page vii.)

STUDY 1 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

STUDY 2 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

STUDY 3 **Title:** _____

Key take-aways for teachers:	Implications for life, if applicable?	Gospel connections, if applicable?

Paper of the Week

This organizer helps you make sense of a hard text: a research article in education. You're encouraged to use AI (ChatGPT, Gemini, etc.) to help you understand it, and to read strategically: look at the headings first, skim the abstract, look up the authors. You do need to spend **30 minutes** on the reading, and turning this in means you did. **Bring it filled out to class for the jigsaw.** (See the example on page viii.)

THE PAPER

The core pieces of its APA citation, in order (see page iii)

Your name: _____

1. Author(s): _____ **2. Year:** _____

3. Title: _____

_____

4. Journal: _____ ☐ **I can find the DOI**

Methodology (what kind of study is it?): _____

THE EVIDENCE

What did they find, and how much should we trust it?

Statistical significance

Look for: **p-value** and **sample size**. What statistical terms show up? Stuck on a term? See page iv.

_____

_____

Practical significance

Look for: **effect size** (and its units), **r**, **R^2**, **Cohen's d**.

_____

_____

_____

Where does this paper sit on the hierarchy of evidence?

Weaker ○——○——○——○——○ *Stronger* **Why?** _____

MAKING SENSE

In your own words

Synthesize: Give a very simple summary of this paper.

Speak to how strong the findings are and whether they matter in practice.

_____

_____

_____

_____

Limitations: What are the weak spots?

_____

_____

Implications for teachers:

_____

_____

What questions do I still have?

_____

_____

Vocabulary to look up

Add the definitions once you look them up.

_____

_____

Unit 4 Review

List everything you learned this unit, in the shortest form you can: bullet points, fragments, terms, names, quick sketches. Include what you learned indirectly, too: teaching methods you saw modeled, something a classmate said, an idea from a friend. Start without looking at your notes, then flip back and add what you missed.

BRAIN DUMP

Everything from Unit 4, as fast as you can

ELABORATE

Narrow it down, then talk it through

ON YOUR OWN

My top ten most meaningful things from this unit

1 _____

2 _____

3 _____

4 _____

5 _____

6 _____

7 _____

8 _____

9 _____

10 _____

WITH YOUR GROUP

Our top five

1 _____

2 _____

3 _____

4 _____

5 _____

ON YOUR OWN AGAIN

The three that matter most to me

1 _____

2 _____

3 _____

Unit 4 Synthesis

Look back at your brain dump and your top three. What difference will this unit make in your life?

TEACHER & DISCIPLE

Who am I becoming?

How will I be a better teacher because of this unit?

How will I be a better disciple?

LEADER

How will I lead better in each place?

In my home

In the Church

In my community

MY COMMITMENT

Make it specific enough that you could tell whether you did it

What will I do differently because of this unit?

Course Synthesis

This is where you pull the whole course together. Before you write, flip back through your workbook: your four unit reviews, your "remember forever" sentences, and your self-checks. Write in your own words, and take your time.

TEACHER *Think of the students you'll teach, in a classroom, a calling, or at home*

How will I be a better teacher because of this course?

DISCIPLE *What has this course taught you about how people learn, change, and grow?*

How will I be a better disciple because of this course?

LEADER *Name real people and real situations*

How will I be a better leader in my home?

In the Church?

In my community?

MY COMMITMENT *Specific enough that you could tell, a year from now, whether you did it*

What do I commit to do differently because of this course?
